

# C-MILL INTERNAL USER EDUCATION

## RECOMMENDED WORKFLOW

### Theoretical basics about the C-Mill

- Intended Use
- Indications / Contraindications / Safety
- Basics about the parameters and adjustments

### Phase I

#### Observe at least 1 C-Mill session as spectator

- Workflow explained and demonstrated by Trainer
- C-Mill Assessments
- Stand, Step and Walk Applications based on Goals

#### At least once, be set up in the C-Mill

- Get the self-experience of training on the C-Mill (with BWS and without).

### Phase II

#### Participate in C-Mill therapy sessions actively

- Get involved actively in more and more steps of the C-Mill therapy
- Get familiar with software handling
- Interaction of the different parameter adjustments
- Challenge the patient

Session 1

Session 2

Session 3

...

#### Perform setups of healthy persons alone under supervision

- Simulation of different scenarios
- Gain confidence

Session 1

...

Trainer gives his OK for the candidate to perform the first patient session under supervision

### Phase III

#### Perform C-Mill therapy under the supervision of a certified C-Mill Trainer

- Trainer rates the user candidate (with the User Requirements Checklist)
- If failed: back to Phase II

If passed

C-Mill User
